NOTE FOR: 

Acting Director, OP/ICS

STAT

SUBJECT: Annual Report

Bill:

After staff meeting today, the DCI mentioned that he had read the annual report and was quite pleased with it. He asked who had done it, and I gave me him the names of those involved. He would like to add a little bit of material and mentioned beefing up the oversight section, putting in more on the NFIB and new estimates process, mentioning the 1985 capabilities study of CI that will be requested by the NSC and the instability center. Over the weekend he will either mark up his copy to be sent back to you or do a memo for you. You should expect something to come out of his office on the subject the early part of next week. *Don't*

do anything until you hear from him.
